

PROJECT

# PRAM

## Progressively Replacing Auction Mobility

A strategic initiative to build Bonhams' own in-house bidding engine ecosystem - delivering superior performance, experience, and commercial flexibility.

Launching Q2 2026 (Online Auctions)

Presentation created by Eric Jivraj, Alejandro Tabares, Dipika Makan

# Agenda

**01** Auction Mobility (AM): Key Challenges

---

**02** Bonhams: Project PRAM

---

**03** New Bonhams Mobile App

---

**04** Online Bidding Engine

---

**05** Registration Engine

---

**06** Future Opportunities

---

# Key Challenges

AM was limiting Bonhams' ability to deliver reliable digital experiences, support new business models, and maintain security and operational efficiency.

## 1 Reliability & Performance

Unstable platform impacting user experience and operations. Frequent issues affecting auctions and registrations.

## 2 Support & Responsiveness

Slow and ineffective support. Delays in issue resolution impacting ongoing auctions and delivery timelines.

## 3 Security & Compliance Gaps

Lack of role-based access control (RBAC). 2FA not standard, required additional paid project. Increased risk exposure.

## 4 Product Limitations

Inflexible platform blocking auto-deposits, auto-payments, evergreen auctions, buy now, priority buy, hybrid auctions, and always-on models.

# Cost & Investment Failures

## Challenge 5 - Cost & Commercial Inefficiency

Consistent high cost for minor changes. I.e. AM charged Bonhams **£15K** for a single paragraph copy change - estimated at 8+ weeks, which ultimately took **12+ weeks**.

## Challenge 6 - Lack of Product Investment

Limited proactive platform improvement from vendor. Enhancements only delivered at additional cost to Bonhams - with no strategic alignment.

## SUMMARY

**AM was not enabling Bonhams to:**

- Scale effectively
- Innovate quickly
- Operate securely and efficiently

---

This drove the need for a more reliable, flexible, and cost-effective platform.

BONHAMS

# Project PRAM

A **strategic initiative by senior leadership** to address all current challenges faced with Auction Mobility - through the creation of Bonhams' own in-house bidding engine ecosystem.

## New Mobile App

Brand new first-in-class mobile application

## Online Bidding Engine

Full control of end-to-end bidding experience

## Registration Engine

Backoffice tool for CS to manage registrations and bids

LAUNCH

**Q2 2026**

Online Auctions

LAUNCH

**Q4 2026**

Live Auctions

LIVE AUCTIONS WILL ALSO INCLUDE

Clerking Console

Auctioneer Console

Live Bidding Page

**Note:** This presentation covers online auction benefits only - a live auctions presentation will follow later this year.

# Mobile App: AM vs PRAM

A brand new first-in-class mobile application delivering a superior bidding experience to Bonhams' customers. Target release date **31st March**. This is subject to Apple/Google's review time. Customers should see an app update **within the next 2 weeks**.

## **BEFORE** AM's Current Mobile App

- ✗ Poor UI/UX and low performance
- ✗ No lot search by filters or category
- ✗ No ability to search for or follow auctions
- ✗ No recommended auctions shown
- ✗ No enhanced lot card information
- ✗ No live/ending-soon auction view
- ✗ Outbid notifications only outside the app

## **AFTER** Bonhams New Mobile App

- ✓ Rich UI/UX with high performance
- ✓ Full lot search by filters and category
- ✓ Search and follow auctions seamlessly
- ✓ Recommended auctions surfaced intelligently
- ✓ Enhanced lot card information displayed
- ✓ Live and ending-soon auctions prominently shown
- ✓ Outbid notifications both inside and outside the app

# Bidding Experience: AM vs PRAM

Full end-to-end control of the online bidding experience, built in-house for superior performance and flexibility. The first online auction running under PRAM will take place in May.

**BEFORE**

## **AM's Current Bidding Experience**

- ✗ Low performance across the platform
- ✗ No enhanced lot card information on the website
- ✗ Slow registration and bidding process
- ✗ Poor UI/UX on the active bids page
- ✗ Lots not sorted by ending soon on active bids
- ✗ No bidding CTAs developed to increase conversion
- ✗ Poor, slow and unreliable auction support

**AFTER**

## **Bonhams New Bidding Experience**

- ✓ High performance across the platform
- ✓ Enhanced lot card information across the website
- ✓ Fast registration and bidding process
- ✓ Rich UI/UX on the active bids page
- ✓ Lots sorted by ending soon on active bids
- ✓ Bidding CTAs developed to increase conversion
- ✓ Efficient, quick and reliable auction support

# Registration Engine: AM vs PRAM

A powerful back-office tool giving CS teams full control over registrations, bids, and auction management. CS teams will be able to start using this tool to manage PRAM-specific auctions from [mid-April](#) onwards.

## **BEFORE** AM's Current Registration Engine

- ✗ Poor UI/UX and low performance
- ✗ Slow data sync - manual retrieval required
- ✗ No lot swapping allowed
- ✗ No search on auction list or by A3 client number
- ✗ No shortcut to open client's page in A3
- ✗ No filter by category / country / type in auction list
- ✗ No house bid cancellation or lowering max bids
- ✗ No millisecond bid trail or max bid history
- ✗ Single timezone view only

## **AFTER** Bonhams New Registration Engine

- ✓ Rich UI/UX with high performance
- ✓ Fast sync with automated data retrieval
- ✓ Lot swapping supported
- ✓ Full search on auction list and by A3 client number
- ✓ Shortcut to open client's page in A3
- ✓ Filter by category / country / type in auction list
- ✓ House bid cancellation and max bid lowering enabled
- ✓ Full bid trail to millisecond with max bid history
- ✓ Multiple timezone support

# Unlocked by PRAM

## Blocked by AM

- ✗ Auto-payments
- ✗ Automated deposits
- ✗ KYC in the app
- ✗ Shipping in the app
- ✗ Sell Hub in the app
- ✗ Buy Now model
- ✗ Priority Buy model
- ✗ BP incentive model
- ✗ Always On model
- ✗ Hybrid Auctions model
- ✗ *More opportunities blocked...*

## Enabled by PRAM

- ✓ Auto-payments
- ✓ Automated deposits
- ✓ KYC in the app
- ✓ Shipping in the app
- ✓ Sell Hub in the app
- ✓ Buy Now model
- ✓ Priority Buy model
- ✓ BP incentive model
- ✓ Always On model
- ✓ Hybrid Auctions model
- ✓ *More opportunities enabled...*

10+

## New future opportunities unlocked by PRAM

PRAM enables Bonhams to pursue a more flexible, innovative, and commercially rich future - none of which is possible under AM.

# Summary of Benefits

**01****Enhanced Bidding Experience**

Higher performance, richer UI/UX and a conversion-optimized end-to-end auction process for customers.

**02****Powerful Registration Engine**

Enhanced functionality that CS/SD teams can leverage to better manage auctions, lots, bids, and more.

**03****Best-in-Class Mobile App**

A brand new mobile app with UI/UX superior to any other auction industry mobile application.

**04****Reliable Auction Support**

Reliable, fast and efficient support during ongoing auctions - eliminating the pain points of AM.

**05****Significant Cost Savings**

Prevents department P&Ls being affected by AM issues and eliminates costly vendor change requests.

**06****Future Opportunity Enablement**

A more flexible, innovative and richer platform for Bonhams' long-term commercial growth.

BONHAMS · PROJECT PRAM

# Thank You

---

PRAM represents Bonhams' commitment to owning its digital future - delivering exceptional experiences for customers and teams alike.
